

### STANDARD RECOVERY DIODES GEN II DO5

Stud Version

#### Features

- High surge current capability
- Designed for a wide range of applications
- Stud cathode and stud anode version
- Leaded version available/ wire version available
- Low thermal resistance
- UL approval pending

50 A

#### Typical Applications

- Battery charges
- Converters
- Power supplies
- Machine tool controls
- Welding

#### Major Ratings and Characteristics

| Parameters   | 50PF (R)...(W) |             | Units            |
|--------------|----------------|-------------|------------------|
|              | 40 to 120      |             |                  |
| $I_{F(AV)}$  |                | 50          | A                |
|              | @ $T_C$        | 140         | °C               |
| $I_{F(RMS)}$ |                | 78          | A                |
| $I_{FSM}$    | @ 50Hz         | 800         | A                |
|              | @ 60Hz         | 830         |                  |
| $I^2t$       | @ 50Hz         | 3200        | A <sup>2</sup> s |
|              | @ 60Hz         | 2900        |                  |
| $V_{RRM}$    | range          | 400 to 1200 | V                |
| $T_J$        | range          | - 55 to 180 | °C               |

International  
IR Rectifier

### ELECTRICAL SPECIFICATIONS

#### Voltage Ratings

| Type number    | Voltage Code | $V_{RRM}$ , maximum repetitive peak reverse voltage<br>V | $V_{RSM}$ , maximum non-repetitive peak reverse voltage<br>V | $I_{RRM}$ max.<br>@ $T_J = 150^\circ\text{C}$<br>mA |
|----------------|--------------|--|--|---|
| 50PF (R)...(W) | 40           | 400  | 500  | 9   |
|                | 80           | 800  | 960  |   |
|                | 120          | 1200   | 1440   |   |

#### Forward Conduction

| Parameter  | 50PF(R)...(W) | Units                       | Conditions   |                |  |
|--|---------------|-----------------------------|--|----------------|--|
|  | 40 to 120     |                             |  |                |  |
| $I_{F(AV)}$ Max. average forward current @ Case temperature          | 50<br>140     | A<br>$^\circ\text{C}$       | 180° conduction, half sine wave  |                |  |
| $I_{F(RMS)}$ Max. RMS forward current                                | 78            | A                           |  |                |  |
| $I_{FSM}$ Max. peak, one-cycle forward, non-repetitive surge current | 800           | A                           | t = 10ms   | No voltage     | Sinusoidal half wave,<br>Initial $T_J = 150^\circ\text{C}$ |
|  | 830           |                             | t = 8.3 ms   | reapplied      |  |
|  | 670           |                             | t = 10ms   | 100% $V_{RRM}$ |  |
|  | 700           |                             | t = 8.3 ms   | reapplied      |  |
| $I^2t$ Maximum $I^2t$ for fusing                                     | 3200          | $\text{A}^2\text{s}$        | t = 10ms   | No voltage     |  |
|  | 2900          |                             | t = 8.3ms  | reapplied      |  |
|  | 2260          |                             | t = 10ms   | 100% $V_{RRM}$ |  |
|  | 2050          |                             | t = 8.3ms  | reapplied      |  |
| $I^2\sqrt{t}$ Maximum $I^2\sqrt{t}$ for fusing                       | 32000         | $\text{A}^2\sqrt{\text{s}}$ | t = 0.1 to 10ms, no voltage reapplied  |                |  |
| $V_{F(TO)}$ Low level value of threshold voltage                     | 0.77          | V                           | $(16.7\% \times \pi \times I_{F(AV)} < I < \pi \times I_{F(AV)})$ , $T_J = T_J \text{ max.}$ |                |  |
| $r_f$ Low level value of forward slope resistance                    | 4.30          | m $\Omega$                  | $(16.7\% \times \pi \times I_{F(AV)} < I < \pi \times I_{F(AV)})$ , $T_J = T_J \text{ max.}$ |                |  |
| $V_{FM}$ Max. forward voltage drop                                   | 1.40          | V                           | $I_{pk} = 125\text{A}$ , $T_J = 25^\circ\text{C}$ , $t_p = 400\mu\text{s}$ rectangular wave  |                |  |

**Thermal and Mechanical Specifications**

| Parameter   | 50PF (R)...(W)        |          | Units                   | Conditions                                 |
|---|-----------------------|----------|-------------------------|--|
|   | 40 to 120             |          |                         |  |
| T <sub>J</sub> Max. junction operating temperature range    | -55 to 180            |          | °C                      |  |
| T <sub>stg</sub> Max. storage temperature range             | -55 to 180            |          |                         |  |
| R <sub>thJC</sub> Max. thermal resistance, junction to case | 0.51                  |          | K/W                     | DC operation                               |
| R <sub>thCS</sub> Max. thermal resistance, case to heatsink | 0.25                  |          |                         | Mounting surface, smooth, flat and greased |
| T Allowable mounting torque                                 | 3.4 <sup>+0-10%</sup> | Nm       | Tighting on nut (1)     |  |
|   | 30                    | lbf · in | Not lubricated threads  |  |
|   | 2.3 <sup>+0-10%</sup> | Nm       | Tighting on hexagon (2) |  |
|   | 20                    | lbf · in | Lubricated threads      |  |
| wt Approximate weight                                       | 15.8 (0.56)           |          | g(oz)                   |  |
| Case style  | DO-203AB (DO5)        |          |                         | See Outline Table                          |

(1) As general recommendation we suggest to tight on Hexagon and not on nut

(2) Torque must be applicable only to Hexagon and not to plastic structure

**ΔR<sub>thJC</sub> Conduction**

(The following table shows the increment of thermal resistance R<sub>thJC</sub> when devices operate at different conduction angles than DC)

| Conduction angle | Sinusoidal conduction | Rectangular conduction | Units | Conditions                           |
|------------------|-----------------------|------------------------|-------|--------------------------------------|
| 180°             | 0.11                  | 0.10                   | K/W   | T <sub>J</sub> = T <sub>J</sub> max. |
| 120°             | 0.16                  | 0.16                   |       |                                      |
| 90°              | 0.20                  | 0.22                   |       |                                      |
| 60°              | 0.29                  | 0.31                   |       |                                      |
| 30°              | 0.49                  | 0.50                   |       |                                      |
